

Process Engineer

For our client in the province of Zeeland we are hiring a **Process Engineer**.

Job description

As member of a highly skilled multidisciplinary engineering team you will be responsible for leading technical efforts for supporting the manufacturing processes.

Responsibilities:

- ✓ Plan and conduct development activities including the process design package / design of new equipment and the establishment including commissioning.
- ✓ Support technical bid evaluation and vendor clarification meetings.
- ✓ Lead projects to implement changes to process and equipment to improve safety, quality, and productivity.
- ✓ Facilitate or support root cause analysis of process upsets, equipment failures to identify & implement corrective actions to prevent reoccurrence.
- ✓ Participate in cross functional problem-solving and improvement teams at the department and division level.
- ✓ Maintain and update relevant Process documentation (e.g. drawings, ATEX Hazardous area reports and P&ID's).
- ✓ Provide expertise to scope reviews, HAZOPs, alarm reviews, safety audits and investigation teams as required.

Your qualifications

- ✓ Bachelor's degree in Chemical Engineering.
- ✓ At least 3-5 years relevant work experience in the chemical/process industry or Engineering company related experience.
- ✓ Functional Safety Engineer (certified) based on international standards IEC 61508 and IEC 61511.
- ✓ Excellent team player with good personal communications and people skills, customer focused and self-motivated.
- ✓ Excellent and proficient communicator in Dutch and English.
- ✓ Experience with design, drafting, field verification, installation, troubleshooting, and problem solving in an industrial setting preferred.
- ✓ Experience with front-end engineering and HAZOP/SIL studies.
- ✓ Strong organizational skills, detail oriented, the ability to multi-task, meet deadlines and adapt in a fast-paced manufacturing environment and prioritize work.
