

P&ID Engineer

For our customer in Zeeland we are in search for a **P&ID Engineer** for a permanent position.

Job description

- ✓ You will analyse assess specifications and technical requirements related to marine systems integration, products, and processes within specified timelines and quality standards.
- ✓ You will develop model basic engineering packages for marine systems based on customer requirements, regulations, and company engineering standards, addressing feedback from customers and Class.
- ✓ You will update basic engineering packages and provide information and guidance to relevant internal and external stakeholders as needed.
- ✓ You will actively seek multidisciplinary interaction to ensure project solutions are in the best interest of overall project objectives.
- ✓ You will identify shortcomings, propose improvements, and contribute to project design reviews.
- ✓ You will ensure compliance with all applicable requirements and specifications.

Your qualifications

- ✓ Technical Bachelor or Master degree.
- ✓ At least 3 years of experience, preferably more.
- ✓ Knowledge of 2D and 3D CAD systems and marine systems engineering.
- ✓ Experience in marine systems engineering on board vessels, familiarity with complex projects, and regulatory bodies.
- ✓ Good command of the Dutch (preferred) and English language both written and verbal.
- ✓ A pre-employment security screening is standard part of the recruitment procedure.
- ✓ Permanent EU citizenship and passport are both required.

What we offer

This is a permanent position in a international company.

You will contribute to challenging technical projects.

A good employment conditions package, including: 40 holidays, a holiday allowance, travel allowance and a nice monthly salary.

Lots of opportunities to further develop internally.
