

Analytical Technician

For a client in Zeeland, we are looking for a **Analytical Technician**.

Vacature omschrijving

- ✓ Supports manufacturing operations by conducting laboratory analyses and evaluating results, as needed, which provides critical data.
- ✓ Prepares samples and performs basic calibration, preventative maintenance and troubleshooting of laboratory instrumentation and methods.
- ✓ Uses data systems to acquire data and monitor analytical system performance.
- ✓ Reports results to clients.
- ✓ Requires broadened technical skills in analytical/scientific methods or operational processes to perform a defined array of activities.
- ✓ May act as an informal resource for team members with less experience.
- ✓ Performs routine analyses.
- ✓ Collects samples according to the Sample Plan.
- ✓ Prepares basic calibration standards.
- ✓ Performs basic calibration and preventative maintenance of analytical systems.
- ✓ Evaluates validity of data, applies basic statistics, interpret results and takes appropriate action.
- ✓ Monitors analytical systems, identifies problems, conducts first-line troubleshooting and escalates as appropriate.
- ✓ Documents, communicates and archives analytical results and calibration data.
- ✓ Follows EH&S and operating discipline management system (ODMS) procedures and practices for work tasks.
- ✓ Suggests improvements to lab work processes and tools.
- ✓ Escalates non-routine requests to appropriate team member for follow-up.

Je profiel

- ✓ Completion of Vocational Education or Upper Secondary Education (i.e. High School Diploma) plus laboratory, manufacturing or other related experience.
- ✓ Post Upper Secondary Education coursework in chemistry or related coursework.
