

Construction technologist lead civil

For a client in Zeeland, we are looking for a **Construction technologist lead civil**.

Vacature omschrijving

Leads the construction management work process discipline, demonstrates lead competencies of directing others, staffing, planning and controlling for the projects assigned to them. Has the primary accountability to ensure that construction of facilities meet EH&S, quality, cost and schedule per the businesses requirements. Typically at this level, leads large projects within the region. Requires advanced skills and expertise in a range of processes, procedures, and systems, and/or specialized technical expertise within an analytical/scientific method or operational process to perform a broad range of complex work assignments. May act as a working team lead, providing subject matter guidance and coordinating work of others.

Responsibilities / Duties

- ✓ Champions the use of construction safety best practices and drive to a zero-incident safety culture on contracts.
- ✓ Leads the construction management staff on a particular project, including visible, proactive leadership in all matters related to safety, quality, schedule and cost.
- ✓ Develops a construction management Plan to identify construction resource needs for a specific project. Ensures that the budget reflects the plan and works with the project manager if discrepancies arise. Works with the construction resource leader to fill the positions.
- ✓ Provides the construction expertise in the Front End Loading (FEL) of a project. Minimizes construction costs through proper planning, technology, application and constructability techniques.
- ✓ Provides input to the Contract Labor Strategy. Manages interactions with the construction companies, understands labor contracts, resolves claims, and monitors/controls labor cost.
- ✓ Understands and utilizes the Global Capital Work Process (GPM) and Construction Work Process discipline. Utilizes the construction expertise networks.
- ✓ Assists in the development of effective construction integrated schedules. Ensures that construction schedules are met or that discrepancies are communicated in a timely fashion.
- ✓ Minimizes start-up and operability issues through the use of quality plans.
- ✓ Drives the utilization of best practices and technology on project.
- ✓ Provides continuous improvement feedback to business technology centers and the hardware disciplines on Most Effective Technology (MET) that will enhance safety, cost, and productivity on future projects.

Je profiel

- ✓ Technical education in the relevant field plus minimum of 15 years construction, manufacturing or other related experience preferred.
- ✓ VCA VOL
