

Sr. Project Engineer

For a chemical multinational we are hiring a **Sr. Project Engineer**

Vacature omschrijving

Leads the engineering activities for capital and expense projects through the Front End Loading, Detailed Design, Construction and Start up phases of the project cycles. Serves as a lead for the multi-discipline engineering effort for a capital project or as a Manufacturing Execution System (MES) Project Lead. Leads the engineering effort on intermediate or smaller large projects. Works on projects globally, including M&A and Divestitures, typically limited to single plant or business implementations and tend to be repeatable MET implementations and require fewer cross-functional resources and limited management of 3rd party contracts/POs. Requires expanded conceptual and practical knowledge in own job discipline and broadens capabilities.

Responsibilities / Duties

- ✓ Drives project execution and coach team on application of the Global Project Methodology (GPM) work process.
- ✓ Provides overall planning and organization during design and construction.
- ✓ Develops staffing plans.
- ✓ Coordinates all design engineering, procurement, and construction activities.
- ✓ Leads the project execution planning including contracting strategy development.
- ✓ Analyzes project risks and develop mitigation plans.
- ✓ Initiates, monitors, and updates the project schedule and estimate. Closely monitors project cost and progress. Manages change to established scope and baselines.
- ✓ Identifies and takes corrective action to ensure the project goals for cycle-time, cost, and quality are met.
- ✓ Delivers as-built and operations/maintenance documentation to the facility.

Je profiel

- ✓ Bachelor's degree plus project, engineering, manufacturing or related experience required.
