

## Technical Subcontract Manager Electrical & Automation

For one of our clients in the province Zeeland we are looking for a **Technical Subcontract Manager Electrical & Automation**.

### Vacature omschrijving

The role:

Guiding and coordinating technical activities related from definition, procurement, engineering until installation of Electrical & Automation systems for new ship designs and for maintenance or refits. Will be ultimately responsible for the desired quality and timely delivery of subcontracted work packages during execution of small/mid-size projects.

Key accountabilities:

- ✓ Supports the Electrical & Automation engineering group on sustained performance by delivering quality engineering products within budget and on a timely basis.
- ✓ Coordinates and facilitates the subcontractors & suppliers contribution to the project(s) during preparation and execution.
- ✓ Takes ownership of the assigned projects to drive targeted results for schedule, quality and costs.
- ✓ Ensures full compliance with all applicable requirements and specifications, imposed by the company and the customer.
- ✓ Organises and/or participates in project reviews.
- ✓ Secures the execution and synchronisation of project activities related to all deliverables and obligations of the Subcontractor(s).
- ✓ Participates during contractual milestones, tests and trials (FAT, HAT and SAT) as accepting party.
- ✓ Assists the warranty authority on all warranty issues that have been identified;
- ✓ Advises the proposal department on proposals for new projects and/or new systems.
- ✓ Supports proposal evaluation(s) by doing technical evaluation and cost/price analysis.
- ✓ Ensures all HSEQ policies and procedures are in place, understood, owned, maintained and followed to ensure a safe and healthy work environment.

### Je profiel

Skills & experience:

- ✓ University or other relevant professional education: related to the engineer discipline.
- ✓ For relevant discipline training: see training matrix.
- ✓ For mandatory safety training: see training matrix.
- ✓ Five (5) years' experience in hands-on acting with engineers, suppliers / subcontractors staff, and project and program managers in (naval) shipbuilding or a related industry.
- ✓ Vast engineering experience and broad knowledge of electrical installations and automation systems, preferably in ships or offshore installations.

- ✓ Project Management skills on basic level.
- ✓ Hands-on experience in manufacture & subcontract management of complex systems.
- ✓ Expertise in a variety of engineering concepts.
- ✓ Experience of working in mid-size project environments.
- ✓ Used to work on Class-regulated products.
- ✓ Good command of the Dutch and English language (written and verbal).
- ✓ Ability to frequently travel long distances and work abroad for longer periods.
